

KimDen

Kimden LED Annunciators

- TFLED lamps provide a wider lighting area
- Five lighting areas are available: milky white, red, green, orange and yellow.
- Various lighting methods: full window/one colour, split window/ two colours, full window/alternate colours.
- Can be designed with or without frames
- FA30 and FAW30 are made with aluminium lattice structures that are very strong for supporting indicators.
- Along with full voltage models, separate type adapters are available to provide access to various power sources
- LED units can be easily replaced from the front surface.
