

# **KimDen**

### **Kimden Surface-Emission LED**

- The very thin units range from 4.4 to 7.1mm in thickness.
- The lighting colours emitted are soft and uniform.
- The units can be mounted directly onto the PC boards because of the 2.54mm pitch existing between terminals.
- The lighting colours emitted are six standard colours: red, yellow, green, yellow-red, yellow-green and amber.
